REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance.

The Examiner notes that the prior art does not disclose or suggest the claimed combination including particularly a coin distributor having a first detection device including a beam emitter, the beam deflector located between a path from the beam emitter to the beam receiver and mounted directly on the coin deflection member for unitary movement of a monolithic body defined by the coin deflection member and the beam deflector between the normal blocking position and the activated acceptance position, as recited in Independent Claim 15. Independent Claim 22 states more broadly that "the coin deflection member defined at least in part by a beam deflector located in a path between the beam emitter and the beam receiver.

The prior art lacks this structure or anything equivalent to it.

The closest prior art, Newton (US 5,484,906), discloses a deflector assembly as illustrated in figure 2 having a beam deflector (38) mounted on platform (36) which is connected to deflector (12). Thus, the deflector and the beam deflector of Newton move separately from each other for the purpose of detecting unauthorized coins having strings or tethers attached. See Newton at col. 1, lines 34-42.
